Who Can Benefit?

Your daughter is having trouble with her ninth grade Geometry class. The teacher always seems to rush through without reviewing. You would love to help but do not have the time and/or do not remember Geometry. Our tutors with expertise in math can help!

Your son's SAT test is coming up in a month and his extracurricular activities have endangered his studying. He wants to go to a top-tier college so he needs to achieve a great score. He is a good student but is intimidated by the test itself. Our tutors will guide him through the testing process for more self-confidence and higher scores.

You want to start your two-year-old with a second language, but he is too young, right? Not with The Enrichment Centers, Inc.'s Language Tutoring for Kids featuring Total Physical Response! Your child will learn shapes, numbers, and colors quickly and with a native accent!

Your Plan For Success

Meeting the Tutor

Our tutors will meet you at your home or a pre-arranged public place (library, school, coffee shop, etc.). We find a tutor who can work with your schedule including evenings and weekends.

Our Approach

Initially, our tutors evaluate the strengths and weaknesses of students by asking questions and observing students carefully. This ensures that lessons are conducted with the student's learning style in mind. We also encourage students to set goals for their own learning! From our evaluation, we create an individualized plan to attain these goals based on our belief that each student is different.

Learning Plans

We emphasize student's strengths and review material as necessary to ensure a solid foundation. If the student simply needs help with the subject at hand, we will forego the review process and focus on the day's material. First, tutors will explain concepts and use fun and innovative methods. Subsequent lessons build upon the student's ever-increasing knowledge.

All Subjects, Ages, & Levels
